

## Rapture

The bronzes embody not just dancers, but dancing itself; not just acrobats, but acrobatics. There is a unity which integrates dance, dramatic action and artistic rendition.

The movement is frozen in a moment, as the performers strut their hour upon the stage and then are embossed forever on memory. They imprint themselves on the consciousness of the viewer from where ironically, they have sprung.

The performers and the audience share the same space, with a dynamic connection. The spotlight falls on the drama, reflecting the theme like a long, philosophical poem. Through simplicity, these bronzes combine contemporary techniques with honest symbolism.
